Instructions for authors

All submitted papers should present research advances. Contributions will be selected upon their quality evaluated by at least two reviewers. Proposals for special sessions are welcome to be considered by the program committee.

One full registration will allow acceptance of up to two papers; each additional accepted paper associated to the same registration will be subject to an additional fee.

Paper format

Submitted full papers are to be 6 to 8 pages length, written in English. Format files and a complete instruction set will be available from the webpage.

Scope
The IPMU Conference is organized every two years with the focus of bringing together scientists working on methods for the management of uncertainty and aggregation of information in intelligent systems. This conference provides a medium for the exchange of ideas between theoreticians and practitioners in these and related areas. In 2008, the conference will be held in Torremolinos, a touristic place very close to Málaga in southern Spain.
